

# Compromise Assessment

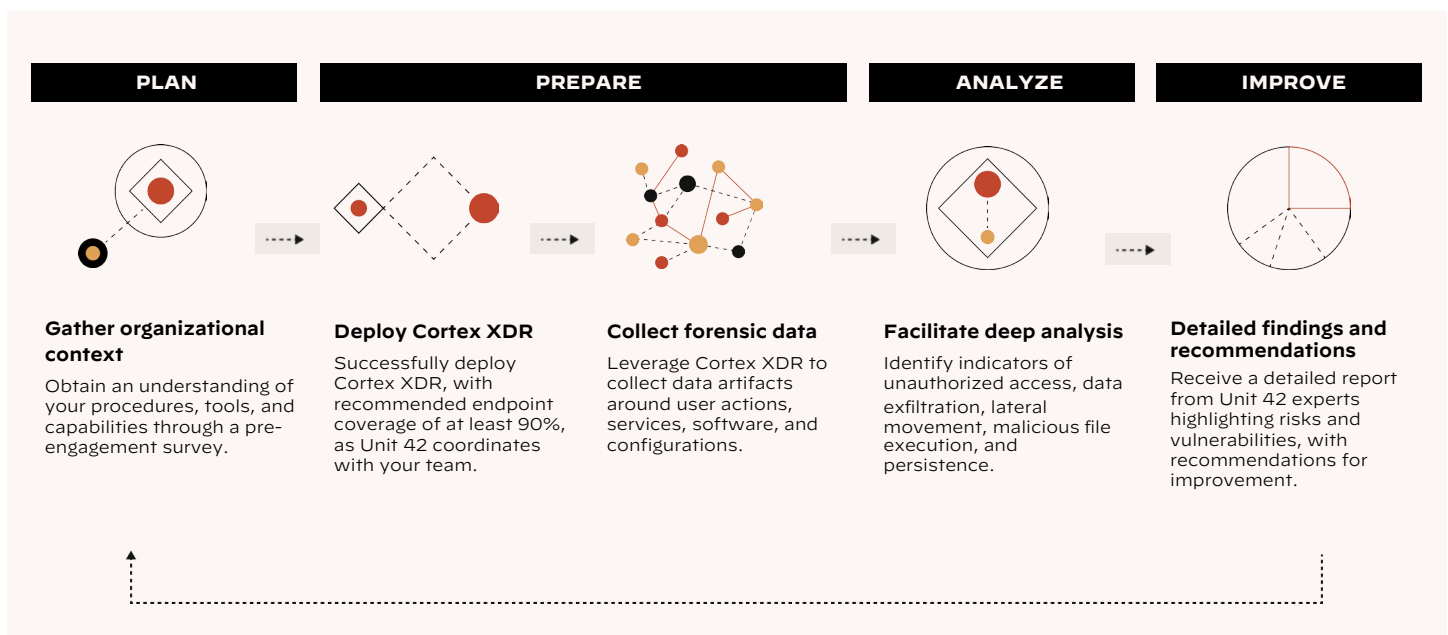

## Find Hidden Indicators of Compromise and Strengthen Your Defenses

Identify hidden threats lurking across your environment to answer the question: “Am I compromised?” When you undertake a compromise assessment with Unit 42, we will proactively search for historical and ongoing indicators of compromise to discover if, how, and why previously undetected malicious activity is occurring so that you can respond before further damage occurs. Collection and analysis of data at this scale enables a deep dive into impacted systems, revealing who may be hiding in your environment so you can better defend your organization. We’ll use a threat-informed approach for this analysis, taking full advantage of extensive telemetry data gathered by Cortex XDR from Palo Alto Networks’ customers worldwide, as well as the unique insights and threat intelligence from Unit 42 experts that can only be gained by working over 1,000 matters per year.

We’ll partner with you to collect the right data and search for precise indicators to uncover the most dangerous and unknown threats and exploited vulnerabilities across your infrastructure. You will also uncover nonmalicious activity that increases cybersecurity risk but ordinarily slips under the radar, such as local administrator accounts, potentially exposed credentials, and suspected shared or default accounts. With this knowledge, you will gain recommendations that are prioritized and aligned with your overall security strategy. Recommendations will be prioritized by criticality and level of difficulty, to help organize your remediation efforts. Unit 42 delivers a holistic view of your attack surface and helps you understand how to limit your exposure so you can achieve peace of mind.

### Benefits

- Identify red flags of potential compromise
- Gain visibility and improve your defenses
- Detect and mitigate hidden cybersecurity threats

### Approved by Cybersecurity Insurance Plans

Unit 42 is on the approved vendor panel of more than 70 major cybersecurity insurance carriers. If you need to use Unit 42 services in connection with a cyber insurance claim, Unit 42 can honor any applicable preferred panel rate in place with the insurance carrier. For the panel rate to apply, just inform Unit 42 at the time of the request for service.

### Under Attack?

If you think you may have been compromised or have an urgent matter, get in touch with the Unit 42 Incident Response team at [start.paloaltonetworks.com/contact-unit42.html](https://start.paloaltonetworks.com/contact-unit42.html) or call North America Toll-Free: 866.486.4842 (866.4.UNIT42), EMEA: +31.20.299.3130, UK: +44.20.3743.3660, APAC: +65.6983.8730, or Japan: +81.50.1790.0200.

## About Unit 42

Palo Alto Networks Unit 42™ brings together world-renowned threat researchers, elite incident responders, and expert security consultants to create an intelligence-driven, response-ready organization that's passionate about helping you proactively manage cyber risk. Together, our team serves as your trusted advisor to help assess and test your security controls against the right threats, transform your security strategy with a threat-informed approach, and respond to incidents in record time so that you get back to business faster.
